- Interior Atrium Access Solutions
- Plans of Service for Façade Access Projects

#### Engineering, Consulting, Testing and Inspection

ATS specializes in engineering and compliance services for building owners and managers, providing expertise in fall protection and façade access/window washing equipment. Our licensed Professional Engineers (P.E.'s) helps our clients maintain the compliance of their equipment, which provides them with unmatched peace of mind. ATS stays at the forefront of building maintenance technology, which benefits our building owner and property management clients by reducing risk and cost. Our engineers are thoroughly educated in OSHA, IWCA, ASME and ANSI compliance, freeing our clients time for other critical operations. Through these services, ATS provides system safety, industry knowledge and compliance to building owners and managers.

### Fall Protection & Façade Access Compliance Program

Do you have a compliance program in place to ensure your fall protection and/or façade access system's compliance? Do you have the required documentation from contractors using the system(s)?

Whether it is for tie-back anchors, davits, monorails, roof cars or fall protection equipment, ATS provides a customized compliance program to suit your building's unique requirements.

### Three Reasons why every building should have compliant equipment:

- To protect personnel
- To reduce liability risks
- To lengthen the life of the investment

### Why Choose ATS:

- We do what's best for the client
- Safety is our #1 priority
- We offer custom solutions to meet the challenges of the most complex building designs
- We have expert knowledge of applicable regulations and standards
- We provide a one-year warranty on installations
- We have superior engineering expertise with licensed Professional Engineers on-staff
- We provide accurate all-inclusive pricing and eliminate the surprise of additional costs later
- We provide a timely, cost-effective solution and manage all project phases
- We have provided engineering services for thousands of buildings across the United States
- We have been in the business of offering expert engineering services since 1967
- We gain customers' trust
- We build long-lasting relationships with our customers
